

Adding papers manually in the Evidence Mapper

On the Import Papers page, scroll down to the “**Include Paper Manually**” section. Click on “**View Form**”. This will bring up a page where you can fill in the details of a new publication.

Full publication URL

Year

Abstract ID from source

Import * ?

Other

Please specify a new import name, if you wish to group papers into a new import

Save

Full citation, authors and title are required fields.

You will need to provide an **import name** to assign the paper to a group.

Once you have finished adding all the details for the paper, click **Save**. This adds the paper to your project and resets the form so you can add details of another paper.

When you have finished manually adding papers, you can click on back to import so you can then continue to the next step.
