

# Automatic deduplication in the Evidence Mapper

When you have finished importing papers for screening, any duplicate entries can be removed and the abstracts can be set up for screening by running the de-duper.

On Step 2 of screening, you will be presented with this page. Click “[Run deduplication process](#)”.

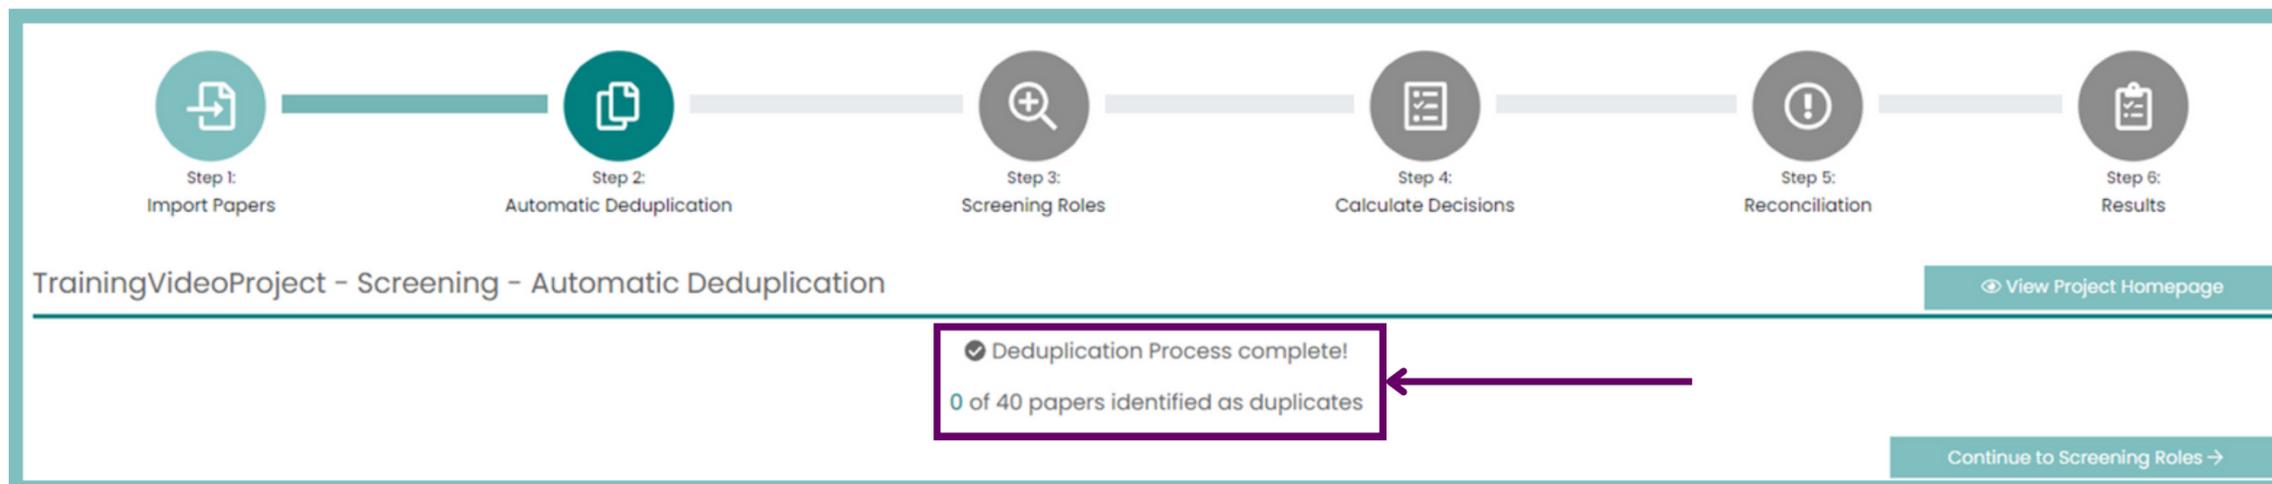

Step 1: Import Papers    Step 2: Automatic Deduplication    Step 3: Screening Roles    Step 4: Calculate Decisions    Step 5: Reconciliation    Step 6: Results

TrainingVideoProject - Screening - Automatic Deduplication [View Project Homepage](#)

You can run the Automatic Deduplication process to have the system automatically make note of any duplicates that it finds in the collection of paper.  
(Note: this process may take a few minutes)
