

# Navigating the landing page of the Evidence Mapper

When you sign in, you will be brought to the landing page with sections for “Projects” and “Clients”.

Under the “Projects” section, you will find an option to create a new project, and another option to view a project created by you or your team.

You can search by project name, or click on “View the list of all projects”

In the “Clients” section, you will have the following options:

1. Create a new client domain
2. Edit client pages
3. View a client's domain (where you can confirm that you have set up the branding correctly for the client's domain etc)
